

SMART INDIA HACKATHON 2026

SIH INTERNAL REVIEW EVALUATION DECK • GRAND FINALE CANDIDATE

PROBLEM STATEMENT & SOLUTION OVERVIEW

- **Problem Statement ID:** 26186
- **Problem Statement Title:** Mental Health & Welfare Monitoring System for CRPF Personnel
- **Project Title:** SETU: Guardian Minds (Confidential Mobile App & Command Web Platform)
- **Theme & Category:** Healthcare & Mental Health Welfare | Mobile & Software Edition
- **Target Organization:** CRPF, Police-II Division, Ministry of Home Affairs (MHA), GoI [Pan-CAPF Scalable]

TEAM ROSTER & INSTITUTION INFORMATION

- **Team ID & Name:** [Your Team ID] | [Your Team Name]
- **Institute / College:** [Your College / University Name]
- **Team Leader:** [Leader Name] (Full-Stack & System Architecture)
- **Core Members:** [Member 2: ML/XAI], [Member 3: Mobile/PWA Dev], [Member 4: Security], [Member 5: UI/UX]
- **Mandatory Female Member:** [Member 6 Name] (Domain Research & Clinical QA)
- **Mentor(s):** [Faculty / Industry Mentor Name(s)]

IDEA TITLE: SETU (GUARDIAN MINDS)

Confidential Welfare Monitoring, Early Triage & Stigma-Free Mobile Support for CRPF Personnel

1. PROPOSED SOLUTION

► Mobile-First Frontline App & Command Triage Prototype

- **Target Beneficiaries:** 3.25+ Lakh CRPF personnel deployed across high-intensity Counter-Naxal/LWE grids, J&K/North-East CI sectors, and Law & Order duties [Pan-CAPF scalable to 10.5+ Lakh troops].
- **Dual-Platform Ecosystem:** Lightweight, offline-first Android Mobile App & PWA for jawans in the field, coupled with an institutional Clinical & Command Web Console for Doctors and HQ.
- **Operational Indicators:** Replaces subjective psychiatric surveys with objective mobile indicators: sleep disruptions, duty shift overextension, and family separation load.

2. DETAILED EXPLANATION

► 5-Tier Role-Based Access Control Architecture

- **Frontline Mobile App:** Touch-optimized Android/PWA interface: 60s Saathi check-in, unmonitored barracks Vishram sanctuary, voice strain check, and SPARSH desk.
- **NCO Tactical Tablet:** Bi-daily (48h–72h) section muster logging patrol fatigue, extreme weather, ration delays, and confidential peer flags.
- **Clinical & HQ Web Console:** Unit Medical Officer receives explainable high-strain dossiers; HQ Admin maintains GIGW 3.0 tamper-evident audit ledger.

3. HOW IT ADDRESSES THE PROBLEM

► Solving Critical Armed Forces Realities

- **Overcoming Stigma via Mobile Privacy:** Personal smartphone app with biometric/PIN lock ensures confidential self-care without fear of weapon de-authorization or career harm.
- **Personal Baseline vs. Group Norms:** Civilian apps compare soldiers against static averages; SETU evaluates each personnel solely against their own 90-day moving baseline.
- **Offline-First Mobile Architecture:** Functions autonomously on Android in remote outposts (Dantewada, Sukma, J&K, North-East) with local SQLite/IndexedDB cache and PoNet / Wi-Fi sync.

4. INNOVATION & UNIQUENESS

► Three Novel Technological Differentiators

- **Personal Baseline Z-Score (ΔZ):** Mathematically tracks standard deviation shifts $((X_t - \mu)/\sigma)$ in personal sleep and endurance rather than arbitrary survey sums.
- **Vishram (Air-Gapped Mobile Sanctuary):** 100% unmonitored bedside relaxation & audio hub with zero telemetry, zero logs, screen-off playback, and zero administrative visibility.
- **Explainable AI (81.7% with SHAP):** Calibrated XGBoost with transparent feature attribution showing doctors exact % triggers (e.g. sleep drop 42%, night sentry 31%).

TECHNICAL APPROACH: ARCHITECTURE & METHODOLOGY

Technologies, Modular Micro-Stack & End-to-End Operational Pipeline

MOBILE APP (ANDROID / PWA) Capacitor / Android & PWA

- **Client:** Touch-Optimized Mobile UI
- **Packaging:** Android APK & Installable PWA
- **Offline Core:** Service Worker & SQLite / Cache
- **Sensors:** Web Audio Voice Strain Check

BACKEND API

FastAPI & Python 3.11

- **API Engine:** Asynchronous REST / Offline Sync
- **Validation:** Pydantic v2 Models
- **ORM:** SQLAlchemy 2.0
- **Database:** PostgreSQL / SQLite

ML & EXPLAINABILITY

XGBoost & SHAP

- **Algorithm:** Gradient Boosted Tree
- **Attribution:** SHAP TreeExplainer
- **Calibration:** Platt Probability Scaling
- **Normalization:** Personal Baseline Z-Score

SECURITY & STANDARDS

GIGW 3.0 & Mobile Security

- **Mobile Lock:** Biometric / PIN App Lock
- **Access:** 5-Tier Military RBAC
- **Audit Log:** Dual IST / UTC Ledger
- **Compliance:** DPDP Act 2023 & MHA

HARDWARE & EDGE

Zero-Cloud & Low-Spec Mobile

- **Target Devices:** Sub-₹10k Android Phones / Tablets
- **Tactical Node:** COTS Laptops / RasPi 4 Edge
- **Network:** Operates on 2G / PoNet / Offline
- **Sovereignty:** 100% On-Premise Host

STAGE 1: MULTI-SOURCE INGESTION

► Operational Signals & Check-ins

- **Mobile Saathi (Android):** 60s one-thumb check-in on sleep, stamina & family connection.
- **NCO Mobile Muster:** 48h-72h section log on rugged mobile/tablet.
- **Peer Box:** Anonymous comrade flag for severe withdrawal symptoms.

STAGE 2: EDGE NORMALIZATION

► Personal Baseline Z-Score (ΔZ)

- **Moving Baseline:** Evaluates metric against personal 90-day history (μ , σ).
- **Formula:** $\Delta Z = (X_t - \mu) / \sigma$ computed across 6 operational vectors.
- **Context Filter:** Differentiates unit-wide hardship from solo distress.

STAGE 3: CALIBRATED ML & XAI

► XGBoost + SHAP Tree Attribution

- **Model Benchmark:** XGBoost (AUC 0.858, F1 0.679) beats LogReg (0.792) & RF (0.824).
- **SHAP Weights:** Deconstructs 81.7% score: Sleep 42%, Shift 31%, Peer 18%.
- **Calibration & Triage:** Platt scaling (Brier 0.048); prototype validation on synthetic cohort.

STAGE 4: CONFIDENTIAL ACTION

► Medical & Welfare Triage

- **Medical Officer:** Clinical triage dossier; notes strictly sealed from command.
- **Welfare Officer:** Coordinates emergency leave, family aid & SPARSH desk.
- **Vishram Mobile:** Unmonitored self-care sanctuary available 24/7 on personal phone.

PROTOTYPE MODEL VALIDATION: Evaluated on 4,001 operational records (N=1,000 holdout, ROC-AUC 0.858, Platt Brier 0.048) • Dual NCO/Saathi safety net • Prototype only, not clinical validation

FEASIBILITY AND VIABILITY: READINESS, RISKS & MITIGATIONS

Multi-Dimensional Feasibility Analysis, Armed Forces Risk Matrix & Technical Safeguards

1. FEASIBILITY ANALYSIS

► Technical, Operational & Regulatory Readiness

- **100% FOSS Architecture:** Built entirely on open-source libraries (FastAPI, React, SQLite, XGBoost); zero commercial license fees or cloud vendor lock-in.
- **Low-Spec Mobile Optimized:** Lightweight APK (<15 MB) runs smoothly on sub-₹10,000 Android phones (Android 8.0+, 2GB RAM); zero background battery drain.
- **Offline-First Mobile Edge:** Local encrypted SQLite/IndexedDB cache operates without internet in forward bases; differential sync when connected to PoNet/Wi-Fi.
- **On-Device Biometric Lock:** Safeguards personal check-in data with device PIN/Fingerprint lock, preventing peer snooping in shared barracks.
- **Zero-Fatigue Mobile Routine:** 60-second Saathi check-in fits post-PT routine; bi-daily NCO section muster takes < 2 minutes on tactical tablet.
- **Bilingual Inclusivity:** Seamless Hindi and English interface designed for personnel from diverse socio-linguistic backgrounds across India.
- **MHA Data Sovereignty & DPDP:** 100% on-premise deployment strictly within government networks; compliant with DPDP Act 2023 and Mental Healthcare Act 2017.

2. CHALLENGES & RISKS

► Real-World Operational & Behavioral Barriers

- **Risk 1: Stigma & Career Fear:** Frontline troops fear admitting distress will cause weapon de-authorization, denial of leaves, or assignment to non-combat duties.
- **Risk 2: Remote / Zero Cellular Link:** Remote tactical operating bases (Sukma, Dantewada, remote J&K/North-East outposts) operate under intermittent 2G or zero cellular reception.
- **Risk 3: False Alarm Fatigue:** Generic static thresholds generate frequent false-positive alerts, overwhelming limited Unit Medical Officers (Doctors).
- **Risk 4: Snooping & Disciplinary Abuse:** Risk of non-medical commanding officers accessing sensitive psychiatric records and using them punitively against personnel.
- **Risk 5: Peer Inaccuracy & Gossip:** Unverified peer reporting causing friction or unfair targeting within tight-knit combat sections.

3. MITIGATION STRATEGIES

► Engineered Architectural Safeguards

- **Mitigation 1 (Air-Gapped Vishram):** 100% unmonitored self-care relaxation sanctuary on personal phone with zero telemetry, zero logs, and zero administrative visibility.
- **Mitigation 2 (Offline-First Mobile Edge):** Autonomous mobile edge storage operates without internet; executes encrypted differential batch sync when military LAN/PoNet is restored.
- **Mitigation 3 (Personal Baseline + SHAP):** Z-score compares soldier to personal history; explainable SHAP weights give doctors transparent evidence, eliminating bias.
- **Mitigation 4 (Strict RBAC & Sealed Dossiers):** Clinical triage records legally sealed from line command; senior officers only see aggregate readiness scores.
- **Mitigation 5 (Dual IST/UTC Immutable Ledger):** SHA-256 tamper-evident audit trail permanently logs every administrative event, preventing unauthorized tampering.

IMPACT AND BENEFITS: TROOP WELFARE & STRATEGIC READINESS

Quantifiable Impact on 10.5+ Lakh Troops, Multi-Tiered Benefits & SDG Alignment

1. POTENTIAL IMPACT ON TARGET AUDIENCE

► Safeguarding 3.25+ Lakh CRPF Personnel (Pan-CAPF Scalable)

- **CRPF Primary Mandate:** Directly protects 3.25+ Lakh active CRPF personnel across Left-Wing Extremism (LWE), J&K/NE counter-insurgency, and Law & Order/RAF duties; architected for pan-CAPF expansion.
- **Direct Mobile Reach in Barracks:** Puts confidential welfare directly into the pockets of 3.25+ Lakh jawans on their personal or unit smartphones without requiring IT labs.
- **30–60 Day Early-Warning Window:** Detects cumulative operational burnout, sleep deprivation, and social withdrawal weeks before acute crisis, self-harm, or fratricide occur.
- **Normalizing Mental Fitness:** Decouples mental wellness from psychiatric stigma, treating psychological recovery and stress mitigation as core combat fitness skills.
- **Institutional Family Support:** Provides dedicated grievance escalation for family land disputes, children's education grants, medical assistance, and SPARSH pensions.
- **Actionable Command Visibility:** Empowers battalion commanders with aggregate, non-invasive visibility into unit fatigue, rest cycles, and morale without violating privacy.

2. MULTI-DIMENSIONAL BENEFITS

► Social, Operational, Economic & Global Alignment

- **Social & Humanitarian Value:** Dramatic reduction in preventable non-combat casualties; protects troop dignity, camaraderie, and psychological safety in forward posts.
- **Operational Combat Readiness:** Maintains frontline cognitive sharpness, alertness, and reaction times in high-threat Counter-Naxal, counter-insurgency, and riot-control duties.
- **Retention & Cost Savings:** Prevents attrition of highly trained commando forces; saves crores in avoidable emergency air evacuations and long-term psychiatric hospitalizations.
- **Zero Recurring License Costs:** 100% open-source architecture eliminates expensive recurring commercial SaaS software subscription charges.
- **Alignment with UN SDGs:** Directly advances three United Nations Sustainable Development Goals:
 - **SDG 3 (Good Health & Well-Being):** Universal, confidential mental healthcare access.
 - **SDG 8 (Decent Work & Economic Growth):** Safe, dignified, stress-monitored working environments.
 - **SDG 16 (Peace, Justice & Strong Institutions):** Accountable, transparent, and ethical institutional governance.

RESEARCH AND REFERENCES: STUDIES & FRAMEWORKS

Government Reports, Clinical Armed Forces Frameworks, ML Literature & Governance Norms

1. GOVERNMENT & ACADEMIC STUDIES

► Official Paramilitary Suicide & Family Stress Studies

- **MHA Task Force Report (2022–23):** Landmark government study on causes of suicides and fratricide in CAPFs; identified prolonged separation, leave delays, and sleep loss as primary stressors.
- **Gupta & Barman (2023, IJFMR ICMRS):** 400-respondent CAPF/CRPF survey establishing family structure impact: 72% nuclear vs 28% joint; nuclear isolation vs joint friction as distinct stress pathways.
- **MHA Leave & Rotation Guidelines:** Official rotation directives requiring regularized rest cycles and non-punitive welfare tracking.

2. CLINICAL & ARMED FORCES STANDARDS

► Psychiatric Frameworks & Military Welfare Protocols

- **NIMHANS Paramilitary Guidelines (2021):** Framework for community-level gatekeeper training, peer distress indicators, and non-stigmatizing triage for uniformed personnel.
- **BPR&D Stress Management Compendium:** Bureau of Police Research and Development compendium on institutional resilience, yoga/relaxation spaces, and welfare audits.
- **Armed Forces Medical Services (AFMS):** Standard operating procedures on confidentiality and legal segregation of medical health records from line command.

3. MACHINE LEARNING & XAI LITERATURE

► Explainability & Longitudinal Anomaly Detection

- **Lundberg & Lee (NeurIPS / Nature MI):** 'A Unified Approach to Interpreting Model Predictions' — foundational theory of SHAP (SHapley Additive exPlanations) for clinical AI transparency.
- **Hastie, Tibshirani & Friedman (Stanford):** 'The Elements of Statistical Learning' — multivariate personal baseline Z-score normalization for longitudinal health telemetry.
- **Platt Scaling (Advances in Large Margin):** Probabilistic calibration transforming decision tree boundaries into true, calibrated likelihood percentages (81.7%).

4. DIGITAL GOVERNANCE & LEGAL NORMS

► Indian Government Standards & Data Protection

- **GIGW 3.0 Guidelines:** Guidelines for Indian Government Websites and Applications: bilingual accessibility, dual IST/UTC logging, and cybersecurity compliance.
- **DPDP Act 2023 & Mental Healthcare Act 2017:** Strict statutory adherence to purpose limitation, privacy-by-design, and legally sealed health records.
- **MeitY & CERT-In Directives:** Information security benchmarks for sensitive defense and paramilitary institutional deployments.
